

2003 Cadillac DeVille DTS

Cadillac has been the standard bearer for luxury sedans for a number of years, even though they lost their way briefly in the Eighties and through the Nineties. BUT they came back with a vengeance supporting a number of prototype racers and an entry at LeMans.

The vehicle we are offering is a low mileage DTS equipped with one of the best motors GM designed and produced, the legendary Northstar. It is a motor that has plenty of torque and horsepower. The Northstar should have become GM's flag ship motor, with a fine balance of power and economy. We get 11.7 liters per 100 KM with a blend of highway and city driving. This is really outstanding fuel economy for any conventional gas powered vehicle, much less a big luxury sedan.

The DeVille is simply put, a Q ship of some renown. Although the styling is conservative the car embodies a well balanced blend of luxury, performance, and handling.

This is a fully optioned car with literally every box checked. The coolest option we've seen in some time is what we affectionately refer to as the "moose hunter." A heat seeking heads up display that silhouettes wildlife a ¼ mile ahead, and it works great.

Our car has been enjoyed for 43,000 Kms. Clean Car fax, never hit, no accidents, no filler. Straight as the day it rolled off the factory assembly line.

It has been maintained at a high level and has hit every scheduled service interval.

Warranty work orders are included with the car.

Striking black exterior that features a cream leather interior. The interior has no cuts, cracks, or tears. The wheels are like new and have no curb rash or other flaws.

If one is looking for a strong running, good handling, straight stopping 5 seater Sedan, with low miles, then you have found your car.

Offered at \$18,500.00

Private Sale – No GST
